Painting & Design: (<http://www.rulanzheng.me/casestudy/artwork>)

EXPERIENCE & PROJECTS

Human Computer Interaction Lab, Computer Science Department

Madison, WI

Undergraduate Researcher (<http://www.rulanzheng.me/casestudy/hci/>)

September 2017 – Present

- Worked on the research question "Is there a difference in memory and comprehension between students who learn from traditional static journal articles and digitally enhanced ones?" (by creating Javascript programs)
- Embedded multiple enhancements into a digital article prototype: pretest/post-test to measure learning, simulations and multimedia for experiencing Methods & Procedures, interactive Results that ask users to predict outcomes before presenting data
- Compared learning results from a static paper article and a digitally enhanced article (video version & simulation version)

Computer Science Department, University of Wisconsin-Madison

Madison, WI

Computer Science Tutor

September 2017 – Present

- Working after classes to counsel students struggling with class material to help them understand introductory-level computer science classes: Data Structures, Java Programming, and Discrete Math
- Directing student computer laboratory work including homework, project assignments and exams

Practice Worldwide, Non-profit Organization

New York City, NY

Website Developer Intern

May 2017 – August 2017

- Designed and implemented a dynamic single-paged website, with multimedia streaming and user inquiry management
- Used AngularJS and Google Firebase to build the company's website which was launched live and has gained thousands plus total hits
- Used Facebook and Twitter API to retrieve live social media feeds

SoundGIFS

Madison, WI

Developer (<http://www.rulanzheng.me/casestudy/soundgifs>)

September 2016 – December 2016

- An iOS app that aims to bring conversation to life by using popular music you hear daily. Replicate a standard messaging application communicate with others by using small clips of music
- Collaborated with teammates to build the app using Swift, Alamofire, SQLite3, AVFoundation
- Focused on user registration and authentication through Facebook Developer API and consistent testing and debugging
- Developed prototypes and designed user interfaces

TwinkleOn

Madison, WI

Developer & Designer & Founder (<http://www.rulanzheng.me/casestudy/twinkleon/>)

May 2016 – July 2017

- An iOS app that works as a platform to connect customers with local retailers who are in poverty (Farmers' Market's live map)
- Conducted over 100 market surveys to identify needs from both local retailers and customers
- Recruited fellow students into a team and delegated responsibilities
- Built iOS application in Objective-C, using Facebook, Google Map, Instagram and WeChat API to retrieve live social media feeds and create interactive user experience
- Developed prototype and designed user interfaces while fixing bugs and consistently updating features using internal testers
